Play rock, paper, scissors 10 times. How many times did your opponent play "rock"? How many times did they play "paper"? How many times did they play "scissors"? Based on those findings what is your best guess for their next move?	Play I spy around your house and find how many math symbols and shapes you can find. Take pictures of two of the most interesting symbols or shapes you found.	If you receive \$2000 a month for your family's entire budget, how would you spend the money? Remember, you must pay your bills and eat. What do you spend the rest of the money on?	Should fast food restaurants rewrite their menus in terms of exercise? According to the McDonald's menu, a Big Mac contains 540 calories. But what does that really mean...and would it be more helpful to describe this as "65 minutes of running"?	Should people with small feet pay less for shoes? When you buy deli meat, the more you get, the more you pay. This isn't the case with shoes, though. A pair of sneakers costs the same in size 6 as in size 12, even though it has less material. How should shoes be priced?
